

<p>AGEMONT, Agency for the economic development of the mountain region The Agency promotes new economic initiatives for the enhancement of the human resources and materials of mountain regions. AGEMONT provides an integrated services system, ranging from economy boosting to technology transfer and management innovation.</p> <p>http://www.agemont.it</p>	<p>AREA Science Park Consortium of Trieste AREA Science Park is one of the main multisector Science and Technology parks at international level. The Park is managed by the Consortium which, in 2005, was recognised by the Italian Ministry of University and Research (MIUR) as a First level research organisation with the task of coordinating the activities of the regional CER Network.</p> <p>http://www.area.trieste.it</p>
<p>Callerio Foundation The Foundation encourages research in the two sectors of oncologic biomedicine and advanced pharmaceutical technology. In oncology, research is targeted at characterising the molecular target of drugs; in pharmaceutical technology it studies the microsystems for oral drug and vaccine delivery.</p> <p>http://www.callerio.org</p>	<p>CBM - Consortium for the Centre of Molecular Biomedicine CBM is a public-private consortium, dedicated to research and advanced training in the field of biotechnologies applied to medicine and coordinating the Molecular Biomedicine Technology District in Friuli Venezia Giulia.</p> <p>http://www.cbm.fvg.it</p>
<p>CETA - Centre for Theoretical and Applied Ecology CETA is committed to the study and planning of equipment for the production of thermal and electrical energy from renewable sources; it also carries out technical and economic feasibility studies as well as designs for demonstration plants of innovative technological systems.</p> <p>http://www.ceta.go.it</p>	<p>CIRMONT - International Mountain Research Centre CIRMONT defines innovative development models for the economic, social and environmental development of the Mountain regions, with special attention to technological research on new products, new production processes and services for the development of the mountain areas.</p> <p>http://www.cirmont.it</p>
<p>CISM - International Centre for Mechanical Sciences The Centre promotes the transfer of knowledge from eminent technical and scientific experts to young researchers and professionals, by organising advanced and professional update courses on topical issues in the field of mechanical sciences, in their different engineering applications.</p> <p>http://www.cism.it</p>	<p>CNR I.C. – Institute of Crystallography The Institute carries out basic research in the fields of structural chemistry, structural biology and science of matters. The I.C. collaborates to the management of the x-ray diffraction line of the ELETTRA Synchrotron Light Laboratory.</p> <p>http://www.ic.cnr.it</p>
<p>CNR INFM Democritos The Centre carries out research on the numerical simulations of matter through nanostructures, advanced scientific training, technology transfer. The Centre also develops software engineering systems for the numerical simulation of matter and high-performance scientific computing.</p> <p>http://www.democritos.it</p>	<p>CNR INFM TASC The Institute develops surface analyses by photoemission spectroscopy, Auger, electron scattering and atomic beams, x-ray diffraction, tunnel-, atomic-force and electronic microscopy. Furthermore, the centre is very active in research on new semiconductor and superconductor materials and microelectronic devices.</p> <p>http://www.tasc.infm.it</p>
<p>CNR ISM - Institute of Structure of Matter The Trieste section was set up with the aim of producing synchrotron light lines at ELETTRA and carrying out research activities mainly in the field of solid state physics, basic and applied research.</p> <p>http://www.ism.cnr.it</p>	<p>CNR ISMAR – Institute of Marine Sciences The Trieste branch of the Institute carries out research and study activities on physical, biophysical and ecological processes relating to ocean circulation, such as the study of mechanisms regulating the biogeochemical cycles associated to ocean circulation.</p> <p>http://www.ismar.cnr.it</p>
<p>Consortium for the increment of studies and research of the Physics Departments of the University of Trieste The Consortium aims, among other things, at contributing to the enhancement of physical sciences at the University of Trieste and at other science institutions of the city (SISSA, INFN, INFM, ICPT).</p>	<p>CReSM, “Guglielmo Marconi” Experimental Radioelectric Centre The Centre is committed to the development of measurement technologies for radio and telecommunication systems. To this end, it develops experimentation, measurement, certification and homologation services in the field of telephony, radio- and satellite communications.</p> <p>http://www.centromarconi.it</p>

<p>CRITA, Centre for Research and Technological Innovation in Agriculture The Centre has the task of updating a complete archive of research activities in the sectors of agriculture and agrifood. Thus, CRITA promotes effective coordination between companies and organisations operating in agriculture and agribusiness at regional level.</p> <p>http://aziendagraria.uniud.it/crita/crita</p>	<p>CRO - Oncology Referral Centre Aviano The Centre carries out research to acquire new knowledge on the etiology and biology of tumours and the identification of new prevention, diagnosis and therapy solutions. CRO provides care and treatment to patients, implements cancer prevention, and is involved in theoretical and practical teaching as well as continuous training in oncology.</p> <p>http://www.cro.sanita.fvg.it</p>
<p>CRP – Centro Ricerche Plast-Optica CRP (Centro Ricerche Plast-Optica) develops applied research activities in the following fields: optics, lighting and visual communication devices, injection moulding of plastic materials and related technologies, micro and nano-technology. CRP provides innovation, services and consulting to SMEs in order to favour their growing up and promote their competitiveness, transferring to them developed innovation.</p> <p>http://www.crho.it/</p>	<p>CSF - Centre for Liver Studies The Centre combines basic research activities and clinical activity for the study of physiological and pathological aspects of the liver. In particular, CSF is committed to the study of the molecular mechanisms of organic anion transport as well as the mechanisms of bilirubin-induced cell damage in the brain and placenta.</p> <p>http://www.fegato.it/intro.asp</p>
<p>CSS – Permanent Innovation theatre of Friuli Venezia Giulia CSS produces and promotes research, experimentation and innovation in the field of performing arts, in particular in drama, as well as the use of technology in show business.</p> <p>http://www.cssudine.it</p>	<p>“Eugenio Medea” IRCCS The Institute carries out research for the prevention of various forms of physical, psychic and sensory disabilities. This is the only legally recognised Italian scientific institution for research and rehabilitation in the specific field of developmental age.</p> <p>http://www.emedea.it</p>
<p>EUROMED Euro-Mediterranean Institute The Institute promotes and organises training, study and research activities in the field of social and economic relations between Europe and the Mediterranean. The Institute is involved in various initiatives regarding Euro-Mediterranean Cooperation.</p>	<p>Friuli Innovazione Consortium The Park was founded to encourage relations between research and the business world, through the exchange of knowledge and the industrial use of the scientific results yielded by the research system at regional level. Friuli Innovazione supplies companies with advanced R&D support and advisory services.</p> <p>http://www.friulinnovazione.it</p>
<p>“Giuseppe Tartini” State Music Conservatory The "Giuseppe Tartini" Conservatory of Trieste was founded in 1903 and is a Higher Institute of Music Studies. The Conservatory pays special attention to the development of international cooperation in educational, artistic and research activities, with the aim of achieving a better integration between different cultures and overcoming development gaps.</p> <p>http://www.conservatorio.trieste.it</p>	<p>ICGEB – the International Centre for Genetic Engineering and Biotechnology ICGEB is a centre of excellence for research and training in molecular biology targeted at developing countries. Its research programmes are focused on molecular biology studies in the field of biomedicine and include basic research projects, virology, immunology, the human molecular genetics of diseases with Mendelian and complex inheritance as well as gene therapy.</p> <p>http://www.icgeb.trieste.it</p>
<p>ICS/UNIDO - International Centre for Science and High Technology - United Nations Industrial Development Organization ICS is a centre for the transfer of advanced technologies to the developing countries with the aim of promoting their sustainable industrial development. ICS is active in the fields of chemistry, the environment, new materials and technology management.</p> <p>http://www.ics.trieste.it</p>	<p>ICTP – International Centre for Theoretical Physics ICTP contributes to the advancement of studies and research in physics and mathematics, facilitates contacts between researchers, in particular those from the developing countries, by promoting international collaborations.</p> <p>http://www.ictp.it</p>
<p>IGA – Applied Genomics Institute Through the analysis of genome structure and functioning, the Institute promotes research on genetic diversity and its relation with the phenotypic diversity of living organisms.</p> <p>http://www.appliedgenomics.org</p>	<p>Immaginario Scientifico Science Centre The Science Centre is an interactive and multimedia science museum, an innovative space which hosts exhibitions and initiatives for the dissemination of scientific and technological culture through playing games, direct experimentation and entertainment.</p> <p>http://www.immaginarioscientifico.it</p>
<p>INAF- Astronomical Observatory of Trieste The Institute carries out research in astronomy and astrophysics in close collaboration with the European Southern Observatory (ESO) for the development of large telescopes as well as with the Italian (ASI), European (ESA) and U.S (NASA) Space Agencies.</p> <p>http://www.ts.astro.it</p>	<p>INdAM - “Francesco Severi” National Institute of High Mathematics The Institute promotes the training and specialisation of mathematical researchers; it carries out research in pure and applied mathematics, by also paying attention to knowledge transfer to technological applications..</p> <p>http://www.altamatematica.it</p>

<p>INFN - National Institute for Nuclear Physics, Trieste Section</p> <p>The Institute aims at studying the fundamental constituents of matter and carries out research in the fields of subnuclear, nuclear and astroparticle physics. INFN is committed to the development of particle detectors and microelectronic devices for data acquisition and management, computing technologies and networks.</p> <p>http://www.ts.infn.it</p>	<p>INFORMEST – ISDEE Studies and Research Area</p> <p>The analysts working at the permanent facility of the ISDEE Studies and Research Area of Informest can rely on a high level of experience and knowledge on the changes taking place within the countries of central and south-eastern Europe, their interrelations and the reform processes characterising their individual EU-accession processes and external relations.</p> <p>http://www.informest.com</p>
<p>International School of Trieste</p> <p>Founded in 1964 on the initiative of the International Centre for Theoretical Physics (I.C.T.P.) and the Italian-American Association, the International School of Trieste provides education in English on all subjects to facilitate communication between different nationalities.</p> <p>http://www.istrieste.org</p>	<p>IRCCS - Burlo Garofolo Scientific Hospital Care Institute</p> <p>Scientific activity is developed by IRCCS-Burlo according to the five research strands approved by the Ministry of Health: maternal-foetal medicine and perinatology; chronic and oncologic diseases with paediatric onset; paediatric surgical sciences; epidemiology, prevention and quality of care; neuroscience of the developmental age.</p> <p>http://www.burlo.trieste.it</p>
<p>ISIG - Institute of International Sociology of Gorizia</p> <p>ISIG conducts studies and research at national and international level and organises meetings on issues concerning the relations between States, nations and ethnic groups as well as the cultural, economic and social development of the population.</p> <p>http://www.isig.it</p>	<p>Italian Liver Foundation</p> <p>The Foundation aims at providing top-quality services in the management of liver diseases and implementing research at both clinical and basic level. Special attention is paid to educational initiatives so as to become a centre of reference for anyone coming from other parts of Italy and other countries and wishing to widen their knowledge in this particular field of medicine.</p> <p>http://www.fegato.it</p>
<p>“Jacopo Tomadini” State Music Conservatory</p> <p>The Conservatory provides higher music education and aims at the promotion and organisation of artistic and scientific research as well as the correlated production activity and the cultural and social development at local level. The goal of the Conservatory is to promote and encourage international exchanges with the scientific and cultural institutions of other countries.</p> <p>http://www.conservatorio.udine.it</p>	<p>KEYMEC Consortium</p> <p>KEYMEC, Mechanics Innovation, Research and Training Centre, through his research and formation activities take the companies, mainly of mechanical sector, to a growing and technological development process, forming researchers and technicians able to conduct the engineering phases in advanced technology research sectors and manager experienced in complex quality and organization processes.</p> <p>http://www.keymec.it/</p>
<p>LNCIB (National Laboratory of the Interuniversity Biotechnology Consortium)</p> <p>The laboratory carries out research and development in the fields of structural and functional genomics, bioinformatics, cell proliferation control and apoptosis, immunobiotechnology and molecular oncology.</p> <p>http://www.lncib.it</p>	<p>“Luciano Fonda” University College for Sciences</p> <p>The College was created to give worthy students from all over the world the possibility to attend the University of Trieste. Two-year scholarships are granted to graduates wishing to attend 2nd-cycle university courses in chemistry, physics and mathematics.</p> <p>http://www.collegio-scienze.ts.it</p>
<p>OGS - National Institute of Oceanography and Experimental Geophysics</p> <p>OGS carries out scientific activities to widen the knowledge on the Earth and its resources. The Institute has developed advanced resources that enable it to manage the acquisition of geophysical data from land and sea, as well as the following stages of data evaluation and interpretation.</p> <p>http://www.ogs.trieste.it</p>	<p>Miramare Marine Reserve</p> <p>The Reserve deals with the management of marine environmental resources and the drafting of management plans for the sustainable use of the coast. Furthermore, the Reserve is very active in scientific dissemination and environmental education.</p> <p>http://www.riservamarinamiramare.it</p>
<p>“Nicolò Canussio” Foundation</p> <p>Nicolò Canussio Foundation promotes and supports initiatives for study, research and dissemination on the ancient world, in its historical expressions, artistic, literary and cultural.</p> <p>http://www.fondazionecanussio.org/</p>	<p>Pordenone Technology Pole</p> <p>This consortium aims at promoting applied scientific research, technological development, the hi-tech production of goods and services as well as higher education in the Science & Technology park of Pordenone.</p> <p>http://www.polo.pn.it</p>
<p>Rinave - Consortium for Higher Naval Research</p> <p>The Consortium was set up with the aim of enhancing the knowledge and results of basic research for the development of industrial application in the naval field. To this end, the Consortium intends to become a point of reference and innovation promotion in the naval and nautical sectors, by providing companies with technological and financial support and services</p>	<p>“Rino Snaidero” Scientific Foundation</p> <p>The Foundation promotes research on the improvement of the quality of life at home: a “factory of ideas” focused on technical-scientific and socio-cultural research capable of generating ideas and positive values on a continuous basis. Furthermore, the Foundation carries out numerous training and cultural activities at international level.</p> <p>http://www.snaiderofoundation.org</p>

<p>SINCROTRONE Trieste scpa The national Laboratory develops basic and applied research programmes mainly in three cutting-edge fields, namely structural biology, magnetic materials and nanotechnologies.</p> <p>http://www.elettra.trieste.it</p>	<p>SISSA- International School of Advanced Studies SISSA-ISAS has been the first institution in Italy to provide post-graduate courses to obtain a PhD qualification. It is specialised in advanced education and research in mathematics, physics, cognitive sciences and neurobiology.</p> <p>http://www.sissa.it</p>
<p>Trieste International Foundation for the Progress and Freedom of Sciences The Foundation promotes the progress, freedom and dissemination of sciences in peaceful applications. The aim is to encourage the collaboration of regional university and research institutions with other international institutions, in particular in developing countries.</p>	<p>TWAS – The Academy of Sciences for the Developing World The Academy promotes scientific research for the sustainable economic and social development of Third world countries, in the effort of improving researchers' working conditions.</p> <p>http://www.twas.org</p>
<p>United World College of the Adriatic O.N.L.U.S. The Duino College belongs to an international organisation comprising another 11 Colleges and offers students the possibility to participate in a two-year international student exchange, at the end of which they will be awarded an "International Baccalaureate" (IB).</p> <p>http://www.uwcad.it</p>	<p>University of Trieste In addition to higher education teaching according to the course cycles provided for by the Italian university system, the University of Trieste is committed to the promotion and organisation of scientific research as well as the dissemination of its results.</p> <p>http://www.units.it</p>
<p>University of Udine The University of Udine promotes the development and progress of culture and sciences through research, teaching and scientific collaboration with Italian and foreign institutions, thereby contributing to the civil, cultural, social and economic development of Friuli.</p> <p>http://www.uniud.it</p>
